Date of Contract

September 2017

CEDARVILLE Contract Value

\$485,000

Date of Completion

Ongoing

Providing Value to a Community Striving to Comply with State and Federal Stormwater Regulations

CEDARVILLE supports Fort Drum to develop and maintain a Multi-Sector General Permit for Stormwater Discharges from Industrial Activity and MS4 Permit Program. We provide comprehensive permit administration that includes: Infrastructure assessment, illicit discharge and pollution prevention, MS4 and MSGP inspections, water sampling, construction site assessments and public education and outreach development.

CEDARVILLE developed a comprehensive stormwater management program plan, stormwater infrastructure maintenance plan and an illicit discharge detection and elimination procedure.

CEDARVILLE's experience and meticulous approach has kept Fort Drum in compliance with all aspects of its stormwater permits. Under CEDARVILLE's guidance, Fort Drum has found and eliminated violations under these permits and because of this, no stormwater violations have been issued to Fort Drum. CEDARVILLE has also identified stormwater infrastructure in need of minor repairs, eliminating long term impacts to the infrastructure system and preventing long term costs associated with total replacement of these infrastructures.

Federal Contracting
